Art Unit: 3662

Claims 85-249 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Taken as a whole the instant application has an undue multiplicity of claims by virtue that the unreasonable number of claims presented would tend to obfuscate, confuse, and becloud the claimed invention. In the examiners judgement, seventy-five (75) claims are sufficient to properly define applicant's invention. Applicant is required to select certain claims, not to exceed seventy-five for examination on the merits. See M.P.E.P. 2173.05(n).

It is further noted that it would appear that a multiplicity of inventions also appear to be involved and the applicant is requested to group his selection according to read on a single invention. The applicant should group the claims according to what he believes to be distinct inventions which may be restricted in a subsequent action.
